

Introduction of LPFM in our area will create a situation wherein the only christian FM radio programming (KLOVE - 106.7) will be superceded due to the technical "precedence" of the LPFM over FM transponder broadcasts. I feel it is important not to approve this initiative for the following reasons:

1. KLOVE provides the only available FM access to Christian events and issues. Events and programming of local interest to the Christian community are broadcast via transponder only in this area
  2. Displacing KLOVE 106.7 by LPFM will result in loss of this programming and information regarding events that citizens in this area are interested in. Furthermore, KLOVE programming provides the only alternative to much of the objectionable content in today's popular music.
  3. KLOVE programming is a key alternative to to the generally available popular programming, and provides information valuable to the Christian community in this area. Maintaining this programming is very much in the public interest.
- As an alternative, I can support this measure if KLOVE is rebroadcast over the LPFM system.
